Summary

Results-driven ICT Manager with over eight (8) years of progressive experience leading enterprise ICT operations, infrastructure management, telecommunications, and digital service delivery across geographically distributed environments. Currently serving as IT Manager for Médecins Sans Frontières (MSF) Tanzania Mission, providing strategic leadership for mission-wide ICT services, infrastructure, cybersecurity, telecommunications, and business continuity.

Proven ability to lead multidisciplinary teams, manage ICT operations across multiple sites, oversee technology projects, develop ICT strategies, manage vendors and budgets, and deliver reliable technology services aligned with organizational objectives. Strong background in ICT governance, service management, infrastructure modernization, disaster recovery, information security, and operational excellence within multicultural and high-pressure environments.

Recognized for building collaborative relationships with senior leadership, improving operational efficiency, mentoring technical teams, and translating business requirements into practical technology solutions that support organizational growth.

Core Competencies

- ICT Strategy, Governance & Service Delivery
- ICT Infrastructure, Networks & End User Computing
- Microsoft Server Administration, Active Directory & Virtualization
- Cybersecurity, Risk Management & Business Continuity
- Incident, Problem, Change & ICT Asset Management
- Vendor, Procurement, Budget & Contract Management
- ICT Project Delivery & Technology Transformation
- Team Leadership, Staff Development & Stakeholder Management
- Radio Telecommunications (HF, VHF, VSAT & Satellite)

Experience

IT Manager | MSF Tanzania Mission | July 2026 – Present

Médecins Sans Frontières (MSF) – Switzerland | Tanzania

- Provide strategic leadership for all ICT operations supporting the Tanzania Mission across multiple operational locations.
- Lead ICT service delivery to ensure high availability, reliability, performance, and security of enterprise technology services.
- Direct ICT infrastructure operations including servers, networks, cybersecurity, communications systems, and end-user computing.
- Manage ICT budgets, procurement activities, vendor contracts, and service provider performance to ensure cost-effective service delivery.
- Lead ICT governance initiatives through the development and implementation of ICT policies, standards, and operational procedures.

- Coordinate ICT projects including infrastructure upgrades, office expansions, system implementations, and technology refresh programmes.
- Oversee ICT asset lifecycle management, ensuring accurate inventory, maintenance planning, compliance, and optimal utilization of ICT resources.
- Drive incident response, risk mitigation, problem resolution, and business continuity planning to minimise operational disruptions.
- Lead, mentor, coach, and develop ICT staff while fostering continuous improvement and operational excellence.
- Build effective relationships with senior management, operational departments, suppliers, and international technical stakeholders.

IT Manager | West Darfur Projects | March 2026 – June 2026

Médecins Sans Frontières (MSF) – Switzerland | Sudan

- Directed ICT operations supporting multiple operational sites within a complex emergency environment.
- Ensured continuous availability of ICT infrastructure, communications systems, and enterprise technology services.
- Managed ICT infrastructure, cybersecurity, telecommunications, and end-user support services.
- Coordinated emergency ICT deployments and rapid restoration of critical business services.
- Managed ICT budgets, procurement activities, vendors, and infrastructure improvement initiatives.
- Implemented ICT governance standards, security controls, and operational procedures.
- Supervised ICT personnel while promoting service quality, technical capability, and operational efficiency.

Country Information Systems Specialist | June 2021 – February 2026

Médecins Sans Frontières (MSF) – Switzerland | Tanzania

- Coordinated mission-wide ICT operations across multiple projects and geographically distributed locations.
- Managed enterprise infrastructure including Microsoft Server environments, Active Directory, virtualization, networking, cybersecurity, and telecommunications systems.
- Led ICT standardization initiatives that improved operational consistency, infrastructure reliability, and equipment lifecycle management.
- Coordinated ICT projects, infrastructure upgrades, office technology deployments, and system implementations.
- Managed ICT assets throughout their lifecycle, ensuring inventory accuracy, compliance, and effective resource utilization.
- Supported ICT budgeting, procurement planning, tender evaluations, and vendor management.
- Developed ICT policies, operational procedures, technical documentation, and best practice guidelines.
- Designed and delivered ICT capacity-building programmes for technical and non-technical staff.
- Collaborated with senior management, logistics, finance, procurement, and HQ technical teams to align ICT services with operational priorities.
- Supported implementation of cybersecurity measures, business continuity initiatives, disaster recovery planning, and ICT risk management.

Logistics Supervisor (Temporary Gap Filling) | Jan–May 2022 | Jan–Mar 2024

Médecins Sans Frontières (MSF) – Switzerland | Tanzania

- Supervised multidisciplinary logistics teams supporting mission operations during critical operational periods.
- Coordinated fleet, facilities, technical equipment, and maintenance activities to ensure uninterrupted operational support.
- Managed resources, work planning, and cross-functional coordination between logistics, ICT, and medical departments.
- Strengthened operational efficiency through effective planning, supervision, and stakeholder collaboration.

Team Lead, Network Support Engineer | August 2018 – May 2021

Maas Computers & Networks Ltd | Dar es salaam, Tanzania

- Led technical teams delivering ICT infrastructure services for enterprise customers across multiple sectors.
- Managed LAN/WAN implementation, Microsoft server administration, network security, and enterprise infrastructure support.
- Coordinated ICT projects, preventive maintenance programmes, and customer support services.
- Supported disaster recovery planning, infrastructure monitoring, and operational continuity.
- Provided technical leadership while ensuring high customer satisfaction and service quality.

Network Performance & Optimization Officer (Intern) | December 2017 – July 2018

Power and Network Backup Co. Ltd | Dar es salaam, Tanzania

- Analyzing Network Performance using network management systems E.g. Huawei PRS to monitor daily key performance indicators like call setup success rates, drop rates, and data throughput.
- Performing Drive Test and Analysis, conducting field tests using test phones and software to collect signal data, identifying coverage gaps, interference issues, and handover failures.
- Identifying and analyzing "worse cells" (cells with poor performance) to determine root causes, such as improper antenna tilt, azimuth, or power configurations.
- Assisting in fine-tuning parameters, such as frequencies, neighbor lists, and scrambling codes, to enhance network efficiency.
- Supporting senior engineers in updating software, configuring network devices, and participating in special events coverage

Education

Bachelor of Engineering in Electronics & Communication (2013 – 2017)

St. Joseph University in Tanzania (College of Engineering & Technology)

Certifications & Trainings

- Sophos Certified Engineer – Network & Firewalls (2021)
- People Management Training – MSF (2023)
- IT & Radio Communication – MSF ICT Week (2023)

Languages

- English – Professional Working Proficiency
- Swahili – Native / Fluent
- French – Beginner
